📁 PROJECTS

LIBRARY MANAGEMENT SYSTEM:

Developed a full-featured library management system using Node.js, Express.js, React, and MongoDB. The application allows users to browse books, manage transactions, and handle book issues/returns with separate admin and user interfaces. It is designed to streamline

COURSE ENROLLMENT APPLICATION PROJECT:

I also built a Course Enrollment Application that streamlines the registration process for students. It features a user-centric design and an automated backend for managing student details and course selections, making it simple and efficient to use

📜 CERTIFICATES

HackerRank Certification:

Front End Proficient Certification

Code Chef :C++, Java , Python Problem Solving Certification

Infosys Spring Board:Basics of Python, Java Algorithms, Front End Development Certification

Great Learning:Java Algorithms Certification
